InterMoor Ltd Celebrates Ten-Year LTI-Free Achievement

InterMoor Ltd, a leading provider of mooring services, foundation solutions and offshore installations in subsea services group Acteon, is proud to announce the completion of its tenth straight year of operation without any lost time incident (LTI).

During this decade, the company has performed close to 2,800 projects from three bases, five storage yards, and numerous quayside locations in the UK and around the world.

Alan Duncan, managing director of InterMoor Ltd, said: "I would like to recognize our entire team for this exceptional performance. Operating 3,653 days without any LTI is nothing short of remarkable in our line of work, since InterMoor's business involves handling extremely heavy mooring equipment, weighing up to 260 tons, in difficult and sometimes dangerous conditions.

"This is a testament to our rigorous safety processes and training programs, and our employees' commitment to always put safety first."

Bruce Strachan, InterMoor Ltd quality assurance and health, safety, and environment, manager, added: "Such an outstanding record could never have been achieved without great team work. From marine laborers, mooring chain inspectors to mariners and senior management, every team member has been dedicated to always making safety a priority and participated in our culmination of over two million man hours with zero accidents or incidents. This 10-year No-LTI achievement is something we can all be very

proud of. We aim to continue our incident-free operations, to nurture our solid safety culture and to ensure that our employees are always safe.”

InterMoor UK Operations is certified to ISO9001:2015, ISO14001:2015 and OHSAS18001:2007.

About subsea services

Acteon's aim is to define, shape and lead subsea services through best-in-class expertise offering full market coverage across the whole life of a subsea field. Acteon's integrated approach to subsea services makes it easy for clients to combine capabilities to meet their specific project needs. Acteon's subsea services companies share knowledge and experience across four business segments to deliver highly efficient solutions tailored to a client's unique challenges, thereby reducing overall cost, risk and complexity.

Risers and moorings

Acteon provides deepwater riser engineering, structural analysis, riser, conductor, flowline and pipeline services to add value and create effective, tailored solutions. Acteon offers world-leading capabilities in high-pressure, high-temperature risers, temporary and permanent moorings, design, supply, installation, relocation and decommissioning. With the largest global inventory of offshore mooring equipment, Acteon also provides global inventory management with rapid delivery.
